

Setting Up Langflow: Installation and Configuration Guide

Follow these steps to install and run Langflow in your environment.

1. Verify Required Dependencies and Infrastructure

Make sure you have the required dependencies and infrastructure:

- [Python](#)
 - macOS and Linux: Version 3.10 to 3.13
 - Windows: Version 3.10 to 3.12
- [uv](#)
- Sufficient infrastructure:
 - Minimum: Dual-core CPU and 2 GB RAM
 - Recommended: Multi-core CPU and at least 4 GB RAM
- Browser:
 - Google Chrome is recommended but not required

Check your Python version:

```
Python --version
```

2. Create a Virtual Environment with uv

Create a virtual environment with [uv](#).

Install uv:

```
pip install uv
```

```
C:\Users\DELL>pip install uv
Defaulting to user installation because normal site-packages is not writeable
Collecting uv
  Downloading uv-0.9.27-py3-none-win_amd64.whl.metadata (12 kB)
Downloading uv-0.9.27-py3-none-win_amd64.whl (23.4 MB)
----- 23.4/23.4 MB 3.8 MB/s 0:00:06
Installing collected packages: uv
Successfully installed uv-0.9.27
```

Create a directory for your virtual environment:

```
mkdir C:\LangflowENV
```

```
C:\Users\DELL>mkdir C:\LangflowENV
C:\Users\DELL>
```

Navigate to the directory:

```
cd C:\LangflowENV
```

```
C:\Users\DELL>cd C:\LangflowENV
C:\LangflowENV>
```

Navigate to where you want your virtual environment to be created, and create it with uv.

```
uv venv
```

```
C:\LangflowENV>uv venv
Using CPython 3.12.11
Creating virtual environment at: .venv
Activate with: .venv\Scripts\activate
C:\LangflowENV>
```

Activate the virtual environment:

```
.venv\Scripts\activate
```

```
C:\LangflowENV>.venv\Scripts\activate
(LangflowENV) C:\LangflowENV>
```

3. Install and Start Langflow

In your virtual environment, install Langflow:

```
uv pip install langflow
```

```
(LangflowENV) C:\LangflowENV>uv pip install langflow
Resolved 593 packages in 13.13s
Prepared 19 packages in 23.43s
Installed 593 packages in 37.18s
+ accelerate==1.12.0
+ ag-ui-protocol==0.1.10
+ agent-lifecycle-toolkit==0.4.5
+ aioboto3==15.5.0
+ aiohttp==3.9.1
```

Start Langflow:

```
uv run langflow run
```

```
(LangflowENV) C:\LangflowENV>uv run langflow run
